and mugs

**Catalogue
2020**

100 years of senator®. 100 years Made in Germany for your advertising success.

Dear friends and business partners,

As a family business, we look forward to looking to the future together with you. Of course, we remain true to our values and our core competence in the field of writing instruments as well as mugs. We are convinced that handwriting will become more important again even in times of digitalisation and our high-quality writing instruments will continue to present your advertising perfectly. And with a good cup of coffee or tea from our extensive range of drinking vessels, your advertising message will be even more memorable.

100 years of senator® doesn't just mean a commitment to tradition and reliability however. We have set ourselves up for the future for you: In 2019, we invested more than 5 million euros to further expand our technological and infrastructural leading role in industry. Our 300 employees do everything they can for you every day, be it in our five sales locations (Germany, France, Great Britain, the Netherlands and Russia), our three printing plants (Germany, France and Great Britain), or our machine assembly and injection moulding departments (both in Germany).

Regarding injection moulding: On the occasion of our 100th anniversary, we are setting the course for the future with regard to materials. From now on you can get our plastic writing instruments from 20,000 pieces on request also made of recycled material. We are also expanding our bio-based range. Today it already comprises four models, which are also produced 100% carbon-neutrally, because sustainability is the main focus for everything we do. This applies to mutual interaction, resource- conserving local production and the longevity of our products.

We look forward to working with you this year, and beyond!

Yours,

Daniel Jeschonowski

100 YEARS **senator**[®]
Extramoreordinary. Since 1920.

100 YEARS OF SENATOR®. 100 YEARS MADE IN GERMANY.

senator® products stand out because they represent a thorough concept targeting individualised brand presentation: a broad range of designs, dependable production and customised printing mean they offer a perfect match with your brand.

Since 1920 Quality Made in Germany

Production and development of writing instruments has been our passion for 100 years. Our value chain within Germany and our many years of production know-how are your assurances for long life products to achieve advertising success.

Strong promo articles on desktops

senator® ball pens and mugs are the perfect accompaniment during everyday work. They boast persuasive functionality to help them quickly become products which are used every day, providing the ideal vehicle for advertising logos again and again, day by day.

Durable products and sustainable processes

We attach great importance to the environment. That's why our materials and production processes are designed to be free of harmful substances, ecologically compatible, waste avoiding and recyclable. We purchase green electricity from hydropower, invest in energy-saving measures and develop our products in such a way that they have a long product life.

Individual production and speedy delivery

Our closeness to the market and our technical possibilities mean we can respond both flexibly and very quickly: also to your short-term needs.

Perfect print technology for every brand identity

The full range of spectacular printing options for our writing instruments and mugs are the guarantees to provide the best presentation for your brand identities. We can help you in selecting the most suitable branding options, and design your promotional items to leave lasting impressions.

We accept responsibility for your safety

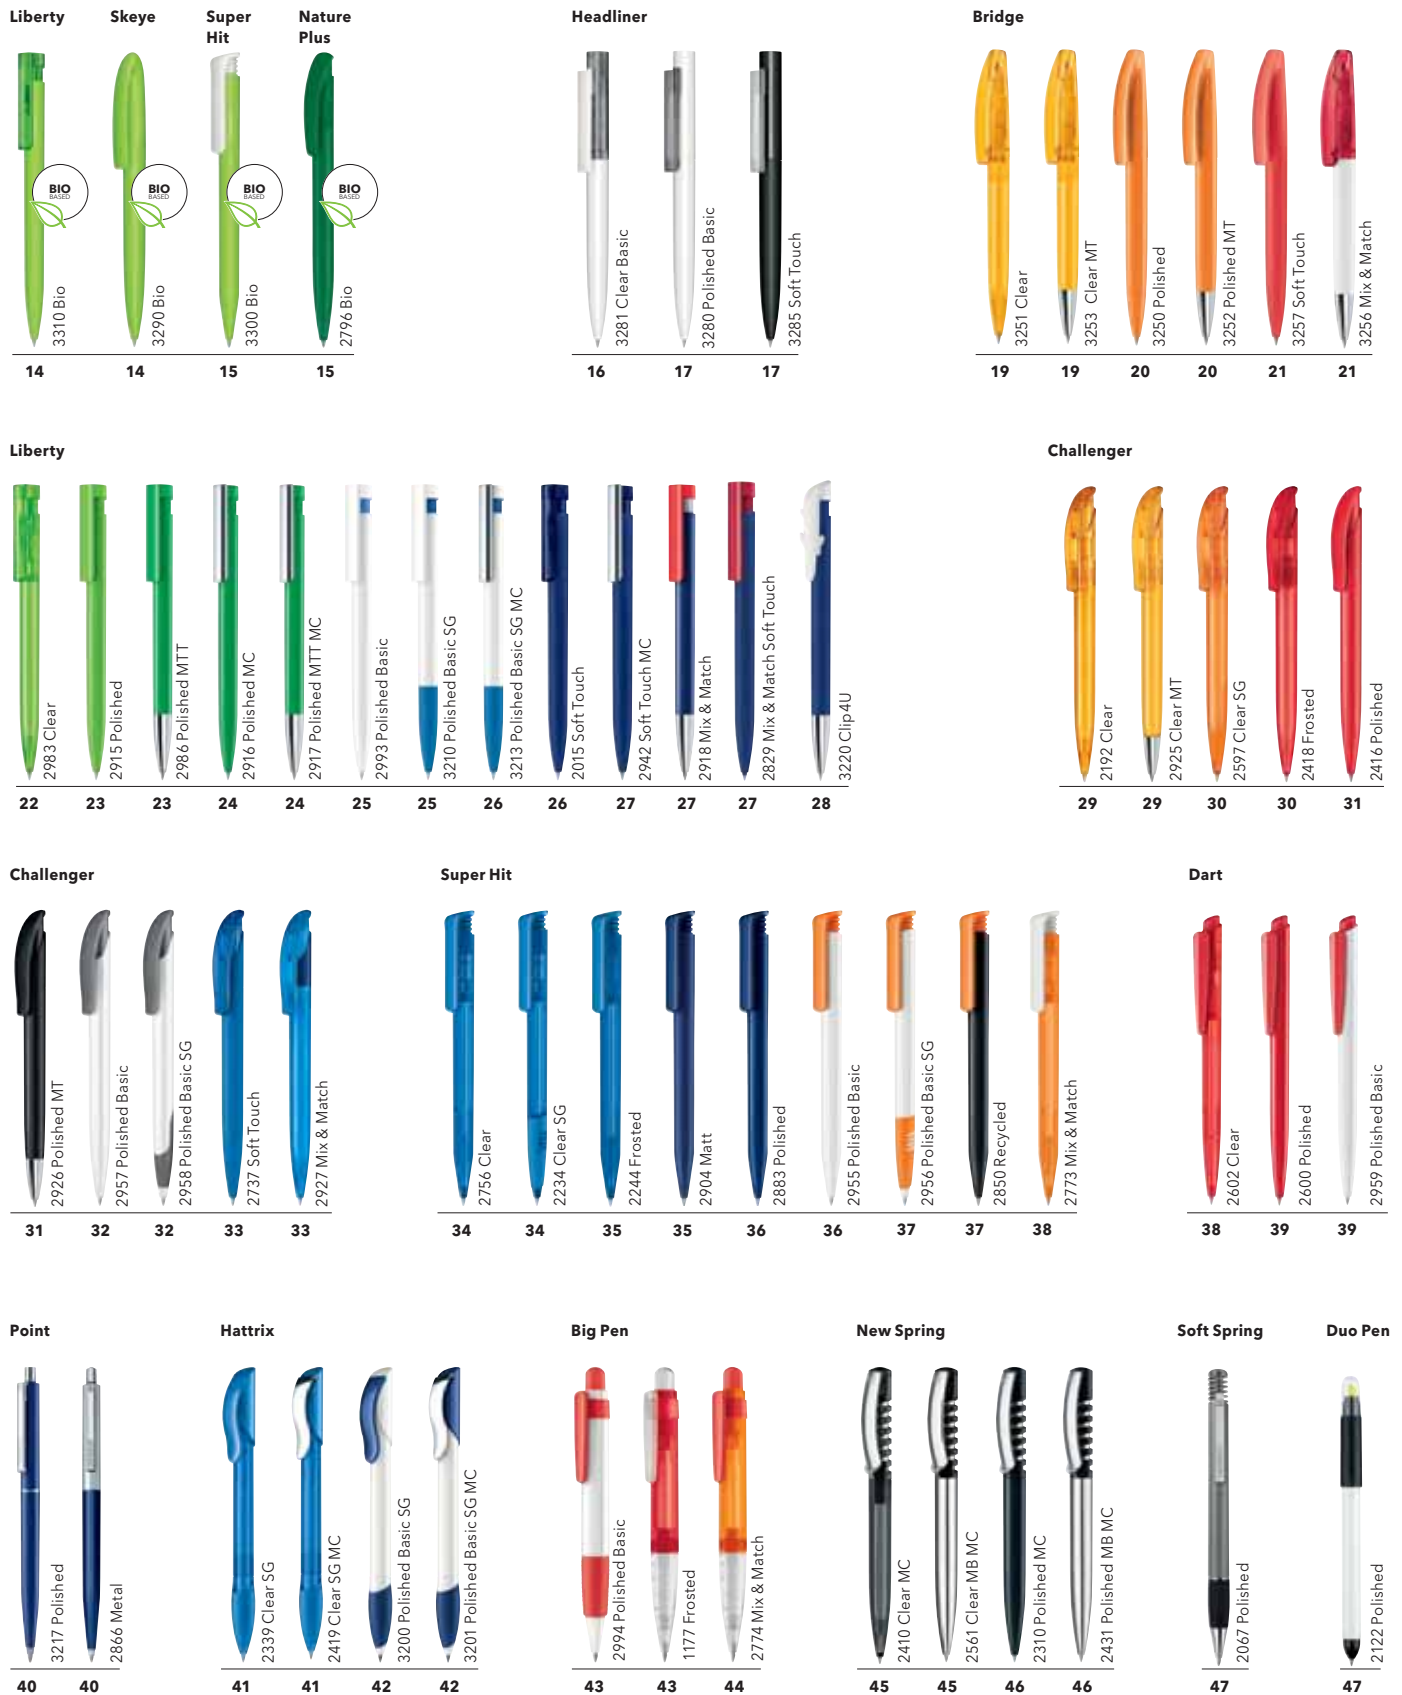

senator® products are always the safe choice and fulfil all legal requirements. To us, the BSCI and Sedex membership is as self-evident as the certification according to ISO 9001, 14001 and SMETA.

MIX & MATCH SERVICE

Customise our pens to fit your corporate design using the senator® Mix & Match Service.

All products marked with the Mix & Match Logo can be mixed in colour and surface.

Contact us. We will be happy to assist you.

COLOUR

Mix all available colours for each component of your chosen model to compliment your brand.

MATERIAL

Choose from the available surfaces for each component and complete with an optional metal tip/clip.

SERVICE

We will happily create a visual for your individual pen if required.

OUR FAST DELIVERY SERVICES

Our guarantee for quick deliveries

You, too, can benefit from the advantages of the unique senator® "5000 in 5" services. All of your orders for volumes of up to 5,000 pieces will be produced within 5 days, including up to 5-colour printing, packaging and ready for dispatch.

5,000 PENS IN 5 DAYS

- 5 days production period from approval of the position sketch
- up to 5,000 pens
- up to 5-colour printing (1 print position, branding methods A and C)
- valid for all colours of the respective model
- blue ink
- Surcharge for this service: 0.048 €/pc.

5,000 IN 5 MODELS

For extra fast deliveries

We can now satisfy even the most express orders for our customers. Up to 1,000 ball pens, with digital print on clip or barrel will leave our factory the next day.

1,000 PENS IN 1 DAY

- Confirmation of the sketch until 12.00 o'clock: Shipment of the goods on the following working day
- 500 to 1,000 ball pens
- Including digital clip print (2E) OR Including digital barrel print (1M)
- blue refill
- valid for the colours: white, black, yellow 7408, orange 151, red 186, blue 2757 and blue 2935 (colour for Super Hit Bio see below)
- Surcharge for this service: 48.00 €

PEN EXPRESS MODELS

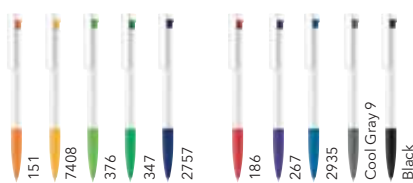

OUR COLOURS FOR YOUR SUCCESS.

With senator® your corporate colour is in safe hands. The colours available for senator® ball pens offer a broad choice of surfaces and models. This gives more flexibility when selecting the best promotional ball pen to perfectly fulfil your needs.

10 Basic colours	151	7408	376	347	2757
	186	267	2935	CoolGr.9	Black
15 Standard colours	201	RhodRed	Hex.Cyan	445	White
	202	255	2735	3145	7699
25 Liberty colours	Red032	804	Yellow	7484	7519

10 BASIC COLOURS

Our basic models offer a combination of white with various colour accents. These basic models, as well as our transparent Hatrix and Liberty models with soft grip zone are available in our top 10 colours.

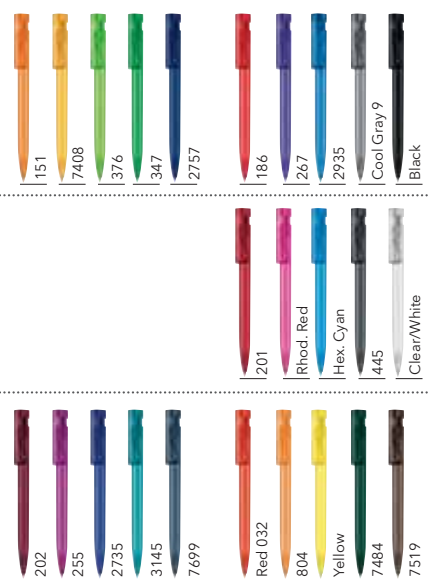

15 STANDARD COLOURS

In order to ensure you have the biggest possible choice and comparison, most of our plastic ball pens are available in our 15 standard colours per surface.

25 LIBERTY COLOURS

Our successful Liberty model also has an unbeatable colour range. In addition to the 15 standard colours, Liberty is available in 10 additional transparent or opaque barrel colours.

LONG-TERM COLOUR GUARANTEE

We guarantee that our 15 standard colours will be available unchanged in the years ahead. You can depend on being able to make follow-up orders in the future for many years from the senator® range for your original colour tone choice.

PMS SERVICE MUGS

COLOUR 4U

Bring your corporate colour to life with our Colour4U service. Tell us your desired colour and we will dye the exterior of your chosen mug to create the perfect eye-catcher.

We hold a large variety of both ceramic and organic (Polylux) colours to choose from. This service is available on all senator® white porcelain mug ranges, except for sets.

We will be happy to assist you with the selection of your colour.

Our Colour 4 can achieve an incredibly broad colour range. These colours only tolerate lower burning temperatures effecting the durability. Even though these colours are suitable for use in standard dishwashers, we recommend hand washing.

PMS SERVICE PENS

You can't find your preferred colour in our catalogue products? Then check our PMS service, which will definitely offer you the right option. Simply tell us the PANTONE® number of your preferred colour and we will produce either the pen in its entirety or only specific parts with your preferred tone.

This service does require certain minimum quantities. For details, please refer to the respective product.

In order to give your approval to the PMS service, we send you a sample piece produced with your preferred colour. To achieve an even higher degree of colour security (for example for the clear or frosted surfaces) we can also on request produce a pre-production sample in advance.

INDUSTRIAL PRICES (€)*

Costs for individual for individual PMS colour: 1,200.00 €

For a proof sample these costs are additional.

*Industrial prices are to be understood as RSP in euro, ex works, VAT not included.

We can also supply our metal pens in different colours. We will be happy to advise you on colours and minimum quantities. Contact us.

Our colour references always refer to the PANTONE® Matching System, however we must point out that the product itself - because of different surfaces, lighting and materials - can differ from the colour tone printed on paper. This is why we cannot accept complaints for such deviations.

BIO PENS

SUSTAINABLE ADVERTISING WITH BIO PLASTICS.

Made from renewable raw materials, durable and biodegradable. The ball pen for your environmentally conscious brand presentation.

SENATOR BIO PRODUCTS

Plastic is a valuable resource but it should be used efficiently, which is why our materials and production processes are designed to be free of harmful substances, ecologically compatible, waste avoiding and recyclable. Close to 100% of our production waste is either reused or recycled.

Our Bio range, however, goes even further. The visible parts of our Nature Plus, Skeye Bio and the barrel of our Super Hit Bio pens are made from a bioplastic which is based on PLA - derived from renewable and non-finite raw materials. Since 2019, our bio pens are completely climate neutral.

Why bioplastics?

Bio-based plastics can help reduce CO₂ emissions and conserve limited resources.

Which material do we use?

We use a PLA based on renewable resources for our bio products.

Our PLA is made from sugar cane. One of the most efficient raw materials for PLA production.

How do we produce?

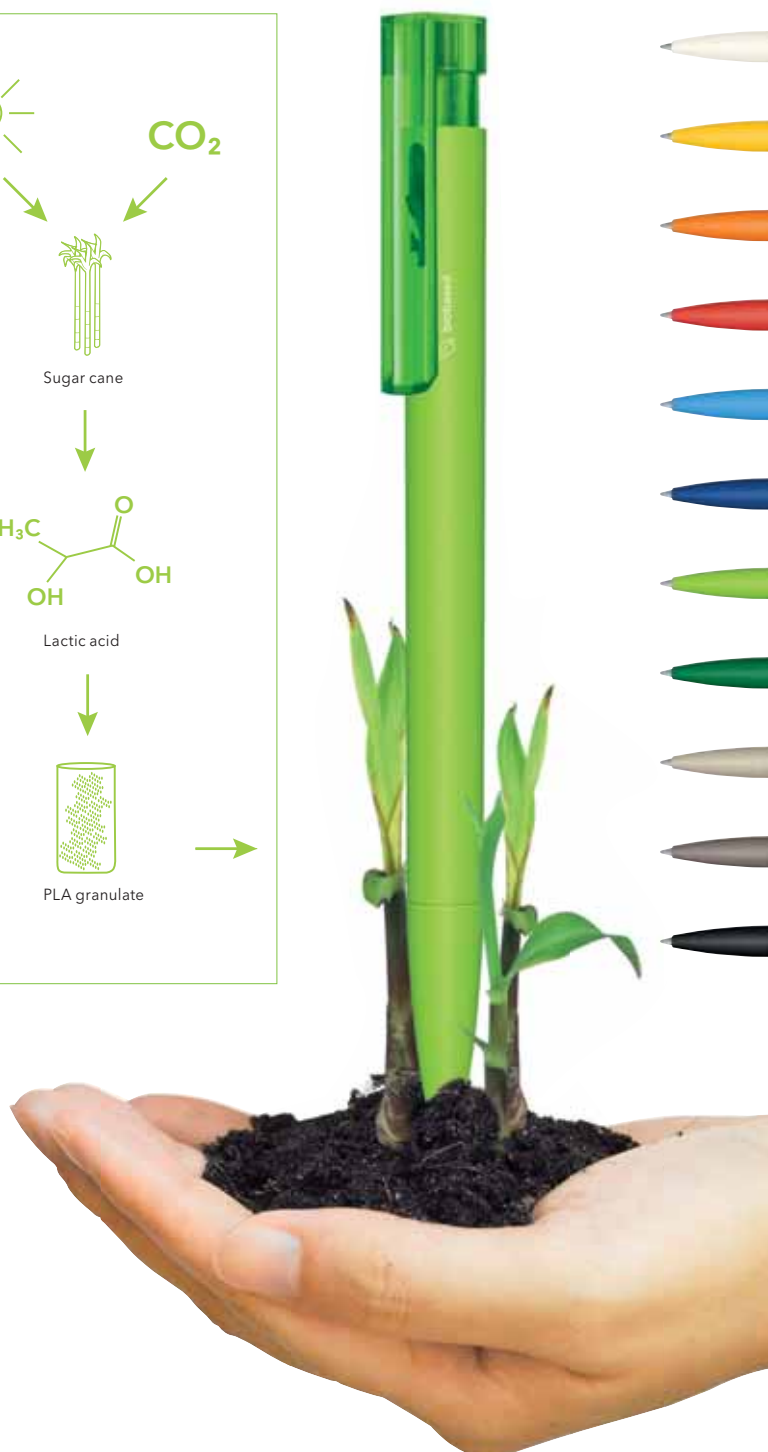

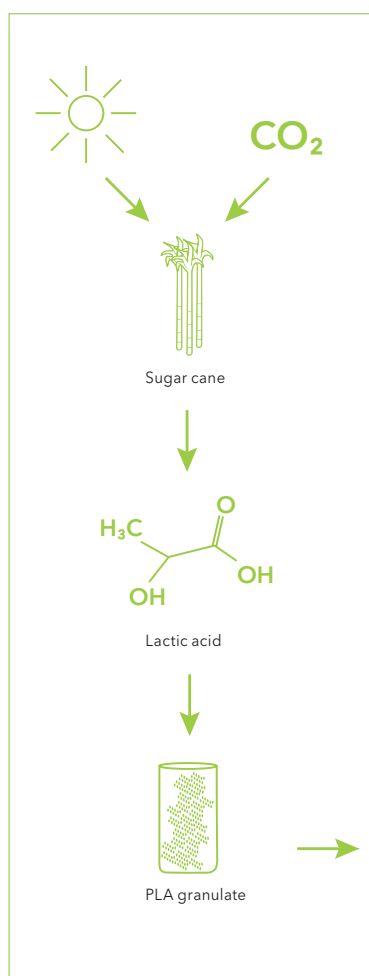

We produce in Groß-Biebrau near Frankfurt. The entire production is operated with carbon neutral green electricity and is set up according to processes of the environmental standard 14001.

What is the advantage to you?

High-quality, sustainable advertising media that remain in use for a long time, permanently placing your advertising message with your target group and creating a positive image.

Did you know ...?

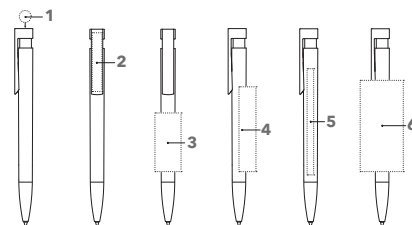

Bio-based plastic from plants is in no way in competition with the production of food. The agricultural area required is very small compared to feed and food and will remain so, even with a significantly higher use of bioplastics.

HD PRINT 360°

HD PRINT 360°

Instead of a simple, yet absolutely flat image as common print technologies, the senator® high definition print enables a brand experience like you have never seen and felt before.

Technology:

The HD print uses the CMYK colour printing process to mix all colours from the basic four. An additional lacquer layer is added on top of the print for a high-gloss raised feel effect.

Strengths:

- Incomparable 3D effect
- Realisation of complex colour gradients
- Accurate reproduction of photorealistic themes
- Reproduction of countless colours

All prices of our branding methods are listed on the fold-out page at the back of this catalogue. Please refer to letter E.

DIGITAL PRINT

DIGITAL PRINT: CLIP / CAP / BARREL

Our Digital Clip print is the perfect solution to apply multicoloured prints on coloured clips or barrels of our ball pens. With this method we also place logos very effectively onto the cap of our Liberty models with plastic clips.

Technology:

The digital print uses the CMYK colour printing process to mix all colours from the basic four. For prints on coloured backgrounds we apply an extra layer of white underneath the print.

Strengths:

- Print to the edge of the clip
- Realisation of colour gradients
- Also suitable for photo-realistic themes

All prices of our branding methods are listed on the fold-out page at the back of this catalogue. Please refer to letters 1M, 2E, 7E.

SCREEN PRINT

SCREEN PRINT

Whenever it comes to branding our ball pen barrels, screen print is the branding method of our choice. The colours used allow a nearly exact reproduction of your corporate colours.

Technology:

Screen print is a direct print process whereby ink is pressed through a mesh onto the ball pen. This process allows a very even ink application.

Strengths:

- Particularly sharp-edged prints
- Large areas printable
- Accurate registration for multicolour prints

All prices of our branding methods are listed on the fold-out page at the back of this catalogue. Please refer to letter A.

TAMPO PRINT

TAMPO PRINT

Tampo print is particularly suitable for printing on curved objects. We therefore use this printing method for branding our ball pen clips.

Technology:

Tampo print is an indirect print method whereby ink is transferred from the cliché via a silicone pad onto the surface to be printed. The result is a very even print on curved objects.

Strengths:

- Best suited to print on curved objects
- Suitable for printing on small parts
- Multicolour prints possible

All prices of our branding methods are listed on the fold-out page at the back of this catalogue. Please refer to letter C.

BARREL PRINT 360°

BARREL PRINT 360°

When it comes to printing all around our cylindrical barrels to use a very large area the Barrel Print 360° is first choice. As we assemble the ball pen only after the print, the barrel can be fully printed even underneath the clip. Prints with up to 5 colours can be achieved.

Technology:

senator® Barrel Print 360° is a special green printing process undertaken at our factory in Germany. The specialised ink used is exposed to UV light, allowing the ink to dry instantaneously, creating a higher quality print.

Strengths:

- Eye-catching results
- Large printing area
- Perfect customisation

All prices of our branding methods are listed on the fold-out page at the back of this catalogue. Please refer to letter D.

BARREL PRINT 360° PLUS

BARREL PRINT 360° PLUS

Barrel Print 360° Plus is the evolution of our Barrel Print 360°. An additional lacquer layer is added on top of the print for a high-gloss raised feel effect.

Technology:

The lacquer layer substitutes one colour of the Barrel Print 360° and can be combined with prints of up to 4 colours.

Strengths:

- Raised 3D surface
- Accentuation of selected elements
- Large printing area

All prices of our branding methods are listed on the fold-out page at the back of this catalogue. Please refer to letter D.

METAL PRINT

METAL PRINT

The surfaces of our metal pens are refined by varnishes, lacquers or other surface coatings. In order to achieve a good bonding of the ink and wear resistance on these surfaces we use our special Metal print method.

Technology:

Metal print is a direct process whereby special ink is pressed through a mesh onto the ball pen. This process allows a very even ink application.

Strengths:

- Great on varnished surfaces
- Brilliant range of colours

All prices of our branding methods are listed on the fold-out page at the back of this catalogue. Please refer to letter H.

LASER ENGRAVING

LASER ENGRAVING

A very elegant branding method on metal surfaces. Logos or messages are very accurately and permanently worked into the metal surface.

Technology:

For our laser engraving we use a high precision computer-controlled laser which engraves the surface of our writing instruments and thus expose the metal layer underneath.

Strengths:

- A high-class and modest result
- Strong with fine lines
- Suitable for individual names

All prices of our branding methods are listed on the fold-out page at the back of this catalogue. Please refer to letter J.

REFILLS

senator® magic flow

1,0 mm

1,4 mm

The refill is a decisive part of the ball pen and contributes considerably to the success of the product. Therefore, when choosing a promotional ball pen, its inner values should be a primary consideration.

A high quality refill ensures a more pleasurable writing experience and guarantees higher levels of exposure and a better economic return for brands.

The **senator® magic flow** refill is one of the best in its class:

- Continuous writing with no spots of ink
- Thanks to a high quality ball and new writing ink in premium quality, this refill offers an extremely smooth and even writing experience
- In two widths:
1.0 mm for all who prefer a clear and fine line
1.4 mm for all who like the lines being a bit stronger
- Indelible to ISO-12757-2 and tested under stringent quality criteria to the highest demands

Ball pen refills

8062 senator® magic flow X20 refill (1.0 mm)

8004 senator® magic flow G2 refill (1.0 mm)

8080 senator® magic flow G2 refill (1.4 mm)

8068 senator® magic flow metal refill, G2

Rollerball refills

1916 Safety roller plastic refill

1904 Safety roller metal refill

BALL PEN REFILLS

Each senator® ball pen is equipped with the perfectly matching refill. We only use tested and standardised quality refills and guarantee:

- Fixed minimum filling quantities for each refill
- Indelibility to ISO-12757-2
- Compliance with customary refill systems

INDUSTRIAL PRICES (€/PC.)

8062	Magic flow refill 1.0 mm, X20, blue or black	0.084 €
8004	Magic flow refill 1.0 mm, G2, blue or black	0.144 €
8080	Magic flow refill 1.4 mm, G2, blue or black	0.240 €
8068	Metal refill 1.0 mm, G2, blue or black	0.480 €

Change of refill and minimum quantities see page 109

ROLLERBALL REFILLS

A characteristic of our senator® rollerball refill is the long "Cap-Off" time.

A rollerball can easily be left on the table without its cap and will start writing any time.

INDUSTRIAL PRICES (€/PC.)

1916	Rollerball refill 0.6 mm, blue or black	0.540 €
1904	Rollerball refill metal 0.6 mm, blue or black	0.840 €

Change of refill and minimum quantities see page 109

Tampoprint note / case

TAMPOPRINT NOTE / CASE

The fine surface structures of our paper books and cases place high demands on the durability of the printing ink. In order to guarantee good adhesion and abrasion resistance on these products, we use our "Tampo Print Note".

Technology:

We use a Tampo print with special inks. On our books we can print monochrome in white and black.

Strengths:

- Holds on structured surfaces
- Brilliant colours

All prices of our branding methods are listed on the fold-out page at the back of this catalogue. Please refer to letter N.

Embossing

EMBOSSING

Flexible surfaces such as the outer pages of senator® paper books or our leather case can be discreetly and permanently individualized with blind embossing. This type of finishing requires no colour at all and is therefore particularly noble.

Technology:

The logo is permanently embossed into the material using heat and pressure with the help of a stamp.

Strengths:

- Understated quality
- 3D effect
- Gives company logos real impact

All prices of our branding methods are listed on the fold-out page at the back of this catalogue. Please refer to letters EB.

DIRECT PRINT

DIRECT PRINT

With the Direct Print method we apply the ink directly onto the mug. This saves time and money.

Many of our mug models are suited for up to 4-colour prints, for some models this print method is restricted to 2 colours. Some print designs cannot be reproduced with the Direct Print method. We will be happy to evaluate your logo prior to printing to make sure this print method is best suited for your project.

The dimensions for the brandings stipulated in the catalogue are valid for most of the logos. Restrictions may occur depending on the logo.

Strengths:

- Short delivery times
- Cost-effective branding method
- Strong with line prints

All prices of our branding methods are listed on the fold-out page at the back of this catalogue. Please refer to letters DP.

TRANSFER PRINT Partial Cover

TRANSFER PRINT, PARTIAL COVER

Transfer Print is a branding method by which we first print the design on a label to be applied onto the mug in a second step. During the firing process the colour combines with the mug surface, the label dissolves up to a small edge around the print design.

Strengths:

- Endless variety
- Strong with half-tone prints
- Nearly perfect with colour gradients

All prices of our branding methods are listed on the fold-out page at the back of this catalogue. Please refer to letters TP.

TRANSFER PRINT Full Cover

TRANSFER PRINT, FULL COVER

The Full Cover version of our transfer print is applied onto a considerably larger area.

For all products that are suited for this large area branding please refer to our product pages in this catalogue.

Strengths:

- Full cover print
- Perfect customisation method
- Large branding area.

All prices of our branding methods are listed on the fold-out page at the back of this catalogue. Please refer to letters TF.

TRANSFER PRINT Full Cover Closed

TRANSFER PRINT, FULL COVER CLOSED

Some of our mug models can be branded on an even larger area using the additional area around or underneath the handle.

For all products that are suited for this large area branding please refer to our product pages in this catalogue.

Strengths:

- Use of the complete area
- Perfect customisation

All prices of our branding methods are listed on the fold-out page at the back of this catalogue. Please refer to letters TC.

SAND BLASTING + LASER ENGRAVING

SANDBLASTING

With the Sandblasting method we grind the design direct into the surface giving the logo depth and structure.

Strengths:

- Striking tactile results
- Perfect for coloured mugs
- Provides depth and structure

All prices of our branding methods are listed on the fold-out page at the back of this catalogue. Please refer to letters SB.

LASER ENGRAVING

A computer-controlled laser engraves a logo or imprint into the item ensuring absolute definition and longlasting branding.

Strengths:

- Understated quality
- Precise reproduction of logos and lettering

All prices of our branding methods are listed on the fold-out page at the back of this catalogue. Please refer to letters LE.

SUBLIMATION

SUBLIMATION

The sublimation process uses pressure and heat to transfer the graphic onto a specially coated mug.

We offer this impressive branding method for a total of 9 different mug designs.

Strengths:

- High colour variety and brilliance
- Photo realistic prints possible
- Already available for small quantities from 36 pieces

All prices of our branding methods are listed on the fold-out page at the back of this catalogue. Please refer to letters SP.

COLOUR 4U

COLOUR 4U

Name your requested colour and we dye the outside of your mug to your requirements.

This is possible for all white porcelain and stoneware mugs in our senator® range except for our tableware sets.

Strengths:

- Supremely customisable
- Colour matching on request

All prices of our branding methods are listed on the fold-out page at the back of this catalogue under Colour 4U.

GLOSSY IMPRESSION

GLOSSY IMPRESSION

With this special branding method we treat the frosted glass surface with a special lacquer. This makes the surface clear transparent again resulting in an eye-catching contrast of transparent and frosted surfaces.

Strengths:

- Unique effects
- Subtle and harmonious

All prices of our branding methods are listed on the fold-out page at the back of this catalogue under Glossy Impression.

ARTWORK

GENERAL INFORMATION

Please send us your artwork in the below mention file types or send text in on of our standard typefaces.

Please also provide a print sample or proof if possible.

Please send logos and text as vectorised files or as TIF-files with 1200 dpi, in case of photos we require a resolution of 600 dpi. Vectorised logos can be scaled without any loss in quality and are to be preferred against pixel files.

Below mentioned minimum font sizes and minimum line widths are guidelines only. Depending on the motive, branding method or product surface smaller letters and finer lines might be possible or larger letters or bigger lines might be necessary.

Proof samples

To make sure you get the best possible result we recommend the production of a sample for approval. (For production reasons slight colour deviations between a print on paper and a print on other materials are unavoidable).

File formats Mac and PC

Adobe Photoshop CC 2019
Adobe Illustrator CC 2019
Adobe Indesign CC 2019
(Please convert all texts into curves)

Dateiformate PC

Corel Draw X8
(Please convert all texts into curves)

Print positions and dimensions

For all information on print positions and dimensions please refer to the product pages of the catalogue.

PENS

Print colours

With the available colour shade mixing range, all Pantone C and HBP K shades can be mixed. Slight colour shade deviations between paper flags and print are unavoidable on white underground. Major colour shade deviations on an underground of a different colour shade or on a dark-shaded underground must be tolerated.

Digital Print

All colours are mixed in CMYK, so it is not possible to print real PMS colours. In nearly every case the colours will be close to.
Very large, uni coloured surfaces cannot be realised.
Minimum size: 8 pt, minimum line width: 0.15 mm

Laser engraving

Minimum line width: 0.15 mm, Minimum front size: 6 pt

Personalisation (list of names)

Many of our products can be customised with the personal name. Please send us the names in an excel file.

Raster

Screen print: Raster of 40, colour intensity 15 - 85%.
360° barrel print: Raster of 48, colour intensity 15 - 85%.

Standard Typefaces

Arial, AvantGarde, Courier, Futura, Present, Serifa, Helvetica, Times New Roman, Univers each regular, bold, italic, bold italic, BrushScript, English script tie each italic and bold italic. Other typefaces possible (only PC), please send font as True Type-face (*.ttf).
Other or similar typefaces on request.

MUGS

Direct Print

On white mugs or glasses

Without trapping in the design:

Minimum size 10 pt, minimum line width 0.2 mm, no raster

With trapping in the design:

Minimum size 10 pt, minimum line width 0.5 mm, no raster

On coloured mugs and glasses a white layer will always have to be layed underneath:

Minimum size 24 pt, minimum line width 0.8 mm, no raster

Transfer print on glass, stainless steel and coloured mugs

Minimum size 12 pt, minimum line width 0.35 mm, printable colour intensity 15 - 85 %.

Laser engraving on stainless steel

Minimum size 8 pt, minimum line width 0.2 mm.

Laser engraving on coloured mugs

Minimum size 12 pt, minimum line width 0.4 mm.

Personalisation (list of names)

A great variety of our mugs can be customised with the personal name. Please send us the names in an excel file. Please note that this very special way of customisation is always possible when the name stands for itself and is not part of the remaining design.

Sandblasting

Minimum size 24 pt, minimum line width 1 mm, no raster.

Sublimation

Minimum size: positive 8 pt, negative 10 pt

Minimum line width: positive 0.2 mm, negative 0.3 mm, no raster.

Transfer Print

Minimum size 8 pt, minimum line width 0.2 mm, printable colour intensity 15 - 85 %.

PRODUCTION

Proof sample

Proof sample per colour & position (plus product price): 48.00 €

Print

To achieve a better printing result it is sometimes recommended to print a white layer underneath the print or to apply the print twice. In these cases printing charges are invoiced once more.

PMS Service

Almost all of our models are available in individual colours according to PMS on request. The minimum quantities are for plastics models 20,000 pieces, mugs 1,000 pieces. For a proof sample these costs are additional. 1,200.00 €

Colour 4U: see fold out page
